PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with an established track record of engineering full-stack software solutions, optimizing database schemas, and building automated data pipelines. Demonstrated technical leader with experience as a Google Student Ambassador running complex technical engagement programs, mentoring over 100+ developers, and implementing automated workflows. Expert in applying core data structures, algorithms, and predictive modeling frameworks to solve complex scalable engineering puzzles.

TECHNICAL SKILLS

Programming Languages:	Python (Advanced), Java, C, SQL (MySQL, SQLite)
AI & Machine Learning:	Deep Learning (CNNs), Predictive Modeling, Data Analysis, Signal Processing, Scikit-Learn
Web Development:	HTML5, CSS3, JavaScript (ES6+), Bootstrap, Flask, Django, RESTful APIs
Automation & Tools:	n8n Workflow Automation, Git, GitHub, VS Code, SolidWorks
Core Competencies:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Database Normalization

ACADEMIC & TECHNICAL PROJECTS

AI-Based Cognitive Disease Detection System / <i>Python, Scikit-Learn, Deep Learning, Signal Processing</i>	Dec 2025 – May 2026
- Engineered an intelligent multimodal AI diagnostic assistant processing speech pattern arrays, eye-tracking metrics, and biometric inputs. - Developed automated raw data preprocessing pipelines isolating high-impact behavioral markers, accelerating model convergence speeds by 25%. - Achieved a 94.2% classification accuracy rate during local testing, presenting the full architecture to technical boards at collegiate summits.	
Loan Management System (Private Finance Department) / <i>Python, MySQL, HTML5, CSS3, JavaScript, Git</i>	Aug 2025 – Nov 2025
- Architected a full-stack digital loan processing platform to fully automate legacy paper ledger tracking, dropping data redundancy by 40%. - Designed relational database schemas with explicit foreign key constraints for dynamic borrower tracking and real-time EMI scheduling. - Optimized complex historical query execution plans, yielding a 30% reduction in query latency for massive user credit lookups.	
Smart Parking Management System / <i>Python (Flask/Django), SQL, HTML5, CSS3, JavaScript</i>	May 2025 – Jul 2025
- Developed a responsive web application executing automated real-time slot allocation routines and vehicle inventory transactions. - Programmed robust backend business validation logic using database transaction locks to completely avoid overlapping allocation anomalies.	
Library Management System / <i>Python, Object-Oriented Programming, File Handling</i>	Jan 2025 – Mar 2025
Built a modular desktop application utilizing strict OOP design patterns to securely streamline tracking workflows and fine calculations.	

EXPERIENCE & LEADERSHIP

Google Student Ambassador (GSA) Program / Google Students Community

Aug 2025 – Present

- Orchestrated 5+ developer hackathons, technical forums, and platform awareness meetups, tracking 500+ active student participants.
- Spearheaded hands-on software workshops teaching large-scale automation frameworks via n8n and conversational LLM structures with Gemini.
- Authored instructional guides and modular tutorial documentation helping 100+ peers leverage cutting-edge AI tooling to scale academic output.

Bharathi Unnathi Fellowship / Leadership & Development Program

Mar 2025 – Aug 2025

- Completed rigorous executive execution training tracks evaluating cross-functional communication dynamics, team synergy, and agile delivery.
- Collaborated inside an engineering squad to deploy regional skill-building modules, achieving target timeline execution metrics.

EDUCATION

Malnad College of Engineering — Hassan, KA

CGPA: 8.61 / 10

B.E. in Computer Science & Engineering (Artificial Intelligence & Machine Learning) — Expected 2027

HKS Pre-University College — Hassan, KA

90.1 %

Pre-University Education (Class XII)

HKS International School — Hassan, KA

86.6 %

Secondary School Leaving Certificate (SSLC)

ACHIEVEMENTS & LANGUAGES

Technical Summits:

Selected to pitch multi-disciplinary engineering frameworks to industry evaluation panels at state-level events.

Languages:

English (Professional), Kannada (Native / Bilingual), Hindi (Conversational)
